NERAC CACHE PROGRAM

NERAC's Cache Program began in 2007. The Cache Sites are a valuable resource and contain hundreds of items available for use by first responders from NERAC communities. More information regarding equipment found at the NERAC Cache Sites can be found on www.NERAC.us under the NE85-Regional Resources tab.

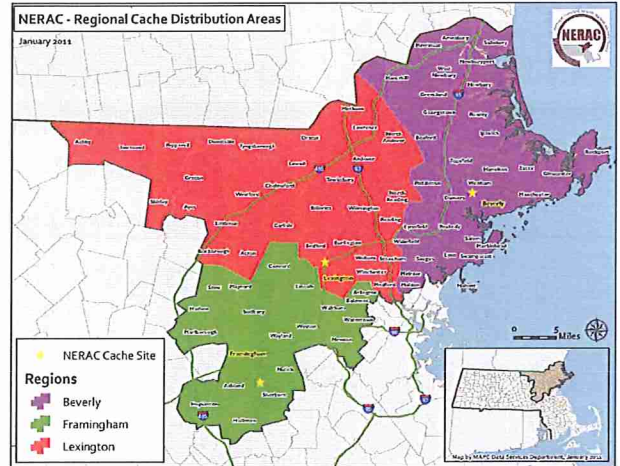

NERAC Cache Program

NERAC established three Regional Cache Sites located in Beverly, Framingham, and Lexington to provide the region's municipalities with critical emergency response equipment for necessary to restore infrastructure and care for their citizens during emergencies. Over \$1.7 million has been invested into this system to provide large resources that cannot be justifiably purchased and maintained by individual municipalities.

Borrowing Cache Equipment

To borrow cached equipment, please contact the Cache Site located nearest to you:

- > Beverly — 978-922-5680
- > Framingham — 508-532-6044
- > Lexington — 781-862-1618

\$46/day

Sign Boards

28 signs of varying sizes and capabilities

\$12-\$20/day

Portable Communications Towers

100' Extendable Antennas

\$80-\$126/day

Cache Fee System

- In an effort to ensure that cache equipment is well taken care of and remains useful for as long as possible, NERAC has established a nominal daily fee for the use of equipment.
- This fee is calculated as 0.1% of the original purchase price of the equipment (per day). These fees are collected by the cache site hosts and kept in segregated accounts to be used for the following:
 - > Equipment inspections
 - > Routine repairs from normal wear and tear of equipment
 - > Routine maintenance
